

## 上海圣威贸易化工 新功能含氟添加剂

### 产品描述 DESCRIPTION

AD541改性四氟抗滴落剂是由聚四氟乙烯（PTFE）和苯乙烯-丙烯晴（SAN）共聚而形成的一种新功能含氟添加剂。其广泛用于塑胶材料当中，AD541可方便的和其他添加剂一起混入塑胶材料中。在模压过程中表面无黑斑，能形成光滑表面。

AD541 MODIFY ANTI-DRIPPING AGENT is a new functional fluoride additive encapsulated by PTFE and SAN. AD541 widely applied in plastics and convenient to mixed with others additive. It has a good dispersing effects with other additive during blending process and get a nice surface on mold parts without any black speck.

### 技术指标 SPECIFICATION

项目(ITEMS)	指标(PARAMETER)	检测方法(TEST METHOD)
外观 Appearance	白色粉末 White powder	
聚四氟乙烯含量% PTFE content%	47-53	
苯乙烯含量% Styrene content%	37.6-42.4	
丙烯晴含量% Acrylonitrile content%	8-12	
含水量% Moisture content%	≤1%	
本体密度 Bulk density KG/L	0.25-0.45	ASTM D1895A

### 主要用途 APPLICATION

AD541改性四氟抗滴落剂主要用于塑胶材料尤其是聚碳酸脂（PC）、ABS、PC/ABS和HIPS上，具有阻燃性，并可有效防止塑胶材料燃烧后滴落。

AD541 MODIFY ANTI-DRIPPING AGENT is used as an additive in plastic to improve anti-dripping performance from flame. Especially for Polycarbonates(PC), ABS, PC/ABC and HIPS etc

### 包 装 PACKAGE

25公斤装入塑料袋中，并密封存于纸板筒内。

Packaged in plastic bag and sealed in paper drum per 25KGS.
